DETAILED ACTION

Allowable Subject Matter

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance:

In regards to claims 1 and 5, none of the references alone or in combination suggested or teaches the limitation "generating an offset value from a comparison of a value of the track error signal that occurs before the detected fundamental change in property of the track to a value of the track error signal that occurs after the detected fundamental change in property of the track."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments, see page 5, filed 5/7/08, with respect to Hong in view of Masaaki have been fully considered and are persuasive. The rejection of claims 1-5 has been withdrawn.

Citation of Prior Arts

Yosimoto et al discloses a servo circuit for controlling the tracking of a light beam on a predetermined track and determining the offset values.

Ohtake et al discloses a servo system for having an offset correct loop for a wobbling track and a push-pull track deviation.

Nagasawa et al discloses an optical disk drive to detect the address pit and the mirror parts to generate an offset in the tracking error signal.
